Note:

As agreed at the Kick-off meeting this deliverable was cancelled because it was decided to focus only on the Sentinel-3 SRAL Altimetry to limit the scope of the project. The change should have been implemented during the revision of the Description of Work that was carried out in 2013. For unknown reasons this was not done, so D5.4 is still listed as a deliverable.

At the second review meeting it was confirmed that Task 5.4 and Deliverable 5.4 were cancelled.
